

BIRCH PLYWOOD PROCESSING

ABOUT US

«Troja» SIA was founded in 1992 and currently is one of the leading plywood processing companies in Europe.

We are a modern, innovative, development-oriented company and our key activity includes birch plywood processing on CNC machines and cutting-to-sizes in accordance with the highest quality standards.

We produce rocking horses, office furniture, traffic road signs, acoustic and 3D panels, as well as other plywood products of higher added value, exported mainly to the countries of Western Europe.
